

Reduce, Reuse, ReCRAFT

In this camp, students will explore texture, color, and form using recycled materials! They will be pushed to think creatively to build hanging wonders, crazy creatures, and more!

Day 1

- **Puzzle pieces!** Students will create a mosaic using little pieces that usually end up in the trash! How can we turn this into something beautiful?

Day 2

- **How's it hanging?** Students will use recycled materials to create creative mobiles that hang, move, and reflect.

Day 3

- **Crazy Creatures!** What sound does *this animal* make? Students will create crazy creatures using recycled materials and papier-mâché.

Day 4

- **Over, Under, Over, Under!** We will play with textiles and fabrics, using our *Modern Quilts* exhibition as inspiration for our projects!

Day 5

- **Outside the box!** Students will explore cardboard in all of its forms. How have artists used cardboard to create sculptures? Students will look at other artists for inspiration and then play with the material to get inspired. How does the material move and change? What can it do? Students will play to create – we will see what they make!
