PUFFY PAINT

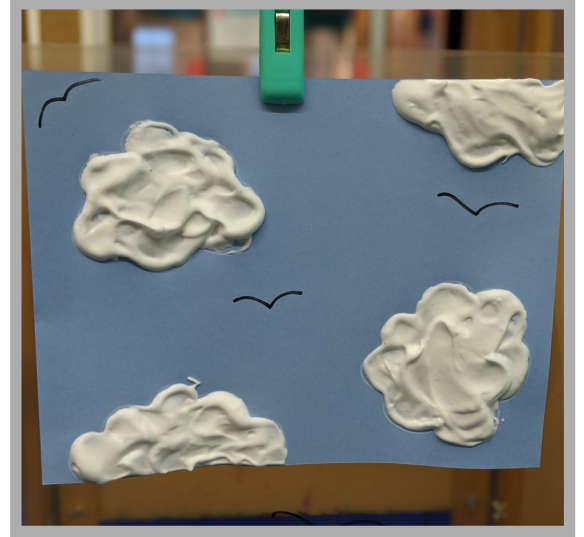

This simple two ingredient puffy paint is great for sensory painting giant puffy clouds or indoor snowmen.

MATERIALS

- Washable white glue, like Elmer's
- Shaving cream
- Bowl
- Paintbrushes
- Paper or cardboard
- Optional: washable tempera paints

INSTRUCTIONS

1. Mix an equal amount of glue and shaving cream in a bowl. Suggested starting amount is 1/2 cup of each.
2. If you want your puffy paint to have color, mix a couple drops of tempera paint in now.
3. Mix together gently. Don't over mix or the paint will lose some of it's puffiness.
4. Paint with brushes or for a more sensory experience, let your child use their hands. What else can you find around your house to paint with? The possibilities are endless!
