Knolling, the process of organizing things in parallel or 90 degree angles, is a fun and artful way to get creative with everyday objects you have around the house.

**MATERIALS**

- Colorful objects you can find in your house.
- A flat surface
- Camera or camera phone (optional)

**INSTRUCTIONS**

1. Gather colorful thing around your house. We chose dog and cat toys because we have a lot of them at home! Some ideas: stuffed animals, toys, books, socks, things you color with.

2. Organize your objects in a square or rectangle, in parallel lines, without any of the objects touching. We organized our knolling in the colors of a rainbow. Little learners may not know what parallel lines are - here is a short video that can help. [https://bit.ly/3fsI3WN](https://bit.ly/3fsI3WN)

3. To take a picture of your knolling masterpiece, make sure you can stand high enough to take a picture from above - this way you can see everything you organized. It is okay to not take a picture and just admire your colorful work!

Share your knolling photographs by using #FIGatHome and tagging us on Facebook, Twitter and Instagram!
