FINGERPRINT RAINBOW

Get your hands dirty, and create a rainbow with a personal touch.

MATERIALS

- Printed rainbow template (included)
- Washable tempera paint:
red, orange, yellow, green, blue, purple
- Cotton balls
- Glue
- Optional: card stock, construction paper

INSTRUCTIONS

1. Print out the rainbow template (included) on white printer paper or white card stock. If using printer paper, glue paper to construction paper before painting to add strength.
2. Dip index finger into red paint and make a fingerprint in one band of the rainbow. Fill the entire band with red fingerprints. We started with the smallest band first and worked our way to the top.
3. Repeat step 2 with the rest of the colors of the rainbow - orange, yellow, green, blue, and purple.
4. When your rainbow is complete, make your clouds. Add some glue to the clouds on the paper. Stretch the cotton balls or leave them as they are and add them to your picture.
5. Let dry completely and hang up!
