

# Shape Robots

## FIG AT HOME

Beep! Boop! Children will use fine motor skills to assemble a robot out of shapes.

### MATERIALS

- Background paper
- Colored paper cut into various shapes
- Scissors
- Glue

### INSTRUCTIONS

1. Start with a piece of paper for your background.
2. Play with the shape and design the body of your robot including arms and legs.
3. Glue the body of your robot to the background.
4. Next, add a face to give your robot personality.
5. Add fashion details to give your robot some style!
6. Name your robot and take it with you on your next adventure!

### THINK ABOUT IT...

- What does your robot help you do?
- How does your robot communicate? Can it talk or make noises?
